VOLA Round Series hand shower
VOLA Round-head shower
Uniquely refreshing. Visibly VOLA

The new VOLA Round Series hand shower

Perfectly echoing the VOLA Round-head shower 060, we present the latest additions to our exclusive shower range: the Round Series hand shower T60 and shower rail T65. Both products effortlessly continue the aesthetically pleasing forms and materials of the innovative Round-head shower.

The timeless and elegant simplicity of the Round-head shower has already won awards from international industry bodies.

Selected by many renowned architects, it is being enjoyed in luxury private bathrooms and hotel suites the world over.

Now, in combination with the new Round Series hand shower and shower rail, it will provide ultimate VOLA design coherence and functional excellence to our most discerning customers - whether for their own contemporary homes or as key elements of an architectural concept.

VOLA Round Series: continuity and evolution

We believe a bathroom should be an area of total departure from the stresses of modern life. One where purity and harmony free the mind and senses.

In response to this, we introduced the VOLA Round Series, taking as its focus the circle - a soothing, geometric form. Complementing the Round-head shower are the paper tissue dispenser and several styles of waste bin. All are discreet and represented by a pure circle on the wall.

Now, true to our twin principles of celebrating continuity and relishing innovation, we are adding the sculptural hand shower to the Round Series family.

It means a luxury bathroom can now be VOLA to its very core, blending not only elements of our extensive range of accessories, but also taking as its starting point our two harmonised round shower products.

VOLA Round-head shower and Round Series hand shower finished in brushed stainless steel shown with built-in flush waste bin and tissue dispenser finished in white with brushed stainless steel ring surround

Consistently VOLA: the secret of calm

At VOLA we believe continuity not only pleases the eye but also calms the spirit. In an increasingly relentless world, we design products whose form and function ease the stress of daily life – and make the bathroom a place of refuge and tranquillity.

Our unique products all take their proportions from the classic Arne Jacobsen tap specially designed for us more than 45 years ago. This creates a visual synergy: it is why they work together so naturally.

The new Round Series hand shower is no exception. It takes the special elements of this design language – the circle and cylinder forms – and combines them with functional simplicity to provide an antidote to the most hectic of lifestyles.

As with each new VOLA launch, our design and production professionals have developed a naturally-evolved product that is both stylishly innovative and reassuringly consistent.

VOLA Round Series hand shower
finished in brushed stainless steel

VOLA Round Series hand shower and accompanying shower rail finished in polished chrome

Aesthetically VOLA: pure and simple

The Round Series hand shower is a seamless extension of the VOLA Round-head shower. They are based on the same design DNA.

The core design elements of the Round Series are the spherical shape and the narrow ring. This elegant ring can be seen clearly in the side view. The slender cylindrical form of the supporting tube extends behind and beyond the shower head, subtly emphasising the latter's status as the key element.

The shower rail also relates to existing VOLA design elements. It is attached to the wall with a circular fixing, matching and adjacent to the round hand shower head – creating a horizontal harmony with the shower taps.

When ready for use, the Round Series hand shower head can be held in place by the optional shower rail. A button responds easily to one hand, sliding it to the best height for effective showering.

VOLA offers choice not only in aesthetics but also in functionality – to create a mind and body experience that combines relaxation and invigoration.

The new Round Series hand shower has a flow rate of 2 gallons of water per minute to accommodate watersens.

Sustainability through water conservation is important to VOLA. But this is only one part of a holistic approach to reducing energy consumption. Our quality products last for generations, keeping the environmental effects of manufacturing to a minimum.

VOLA choice: options in opulence

VOLA is about the customer – and about the ultimate destination for each product. That's why the new Round Series hand shower comes in polished chrome, brushed chrome, natural brass, brushed stainless steel and 14 different colours to suit personal tastes and desired effects.

VOLA Round Series hand shower
finished in brushed stainless steel

VOLA Round Series hand
shower finished in polished chrome

Perfectly VOLA: careful craftsmanship

The striking geometric forms on the Round Series hand shower head are immediately apparent – its eight architectural lines fanning out from the centre. Facing outwards from the wall, these perfectly reflect the original Round-head shower's 18 lines. And, in just the same way as the larger shower head, the water nozzles are drawn back into the form to create a calming, smooth finish.

Polymer detailing on the tube provides a comfortable hold and mirrors the design of the shower head: being drawn back into the form for elegant simplicity.

VOLA Round-head shower

The VOLA Round-head shower made history as the first shower designed by VOLA based on the calming shape of a sphere. It was a natural extension of the VOLA range – and a key element in the award-winning Round Series.

A shower of choice among international architects, it already graces the homes of discerning private individuals and the bathroom suites of prestigious hotels worldwide.

Cohesively VOLA: visual connections

In living spaces that demand total cohesion between architecture and design, the Round Series provides a harmonious solution: with each product creating visual echoes of the next.

Choice is at the very heart of what we do. The consistency of our design philosophy and the

inter-relationship between our forms enable us to offer a modular system, where each product can be combined with another with perfect ease.

The existing Round-head shower and new Round Series hand shower now combine as essential elements of the perfectly sculpted bathroom suite.

VOLA choice: options in opulence

VOLA recognises that every customer is different. That is why the Round-head shower offers a variety of configurations and finishes for ultimate satisfaction.

It can be ceiling- or wall-mounted. It can be finished in polished chrome, brushed chrome, natural brass, brushed stainless steel and 14 different colours.

The core design element of the Round Series is a narrow ring. The Round-head shower adopts the same element, clearly visible from the side.

In the wall-mounted model, the relationships between the two cylindrical forms – one horizontal, one vertical – and the shower ring itself, carefully mirror classic VOLA design proportions.

Wall mounted VOLA Round-head shower
finished in polished chrome

Perfectly VOLA: careful craftsmanship

VOLA uses only the highest quality raw materials. We apply our timeless designs and detailed processes to finish each product to perfection.

The shower plate has 18 lines which fan out from the centre, each holding 12 rubber nozzles. As in the new Round Series hand shower, the nozzles are drawn back into the form, contributing to its elegant appearance.

In the brushed stainless steel model, the material has been brushed by hand in a circular motion to echo the ringed form.

VOLA innovation: a long tradition

At VOLA we take pride in the continuity of our design language. But we also celebrate novelty and innovation with each new product. More than 45 years since the first VOLA tap was born, our designs are still receiving recognition from the industry.

The VOLA Round-head shower is designed by Aarhus Arkitekterne.

Here is a selection of our recent accolades:

- GERMAN DESIGN AWARD 2015 (German Design Council) - for the hands-free soap dispenser RS10
- INTERIOR INNOVATION AWARD 2014 (German Design Council) - for the hands-free soap dispenser RS10
- GERMAN DESIGN AWARD 2014 (German Design Council) - for the Round-head shower 060
- GOOD DESIGN AWARD 2013 (The Chicago Athenaeum: Museum of Architecture and Design) - for the Round-head shower 060
- PLUS X AWARD – Best Product of the Year 2011 in its category/seals of approval in Innovation, Design and Functionality - for the Round Series
- GOOD DESIGN AWARD 2009 (The Chicago Athenaeum: Museum of Architecture and Design) - for the towel warmer T39, and the free-standing shower FS3
- GOOD DESIGN AWARD 2007 (The Chicago Athenaeum: Museum of Architecture and Design) - for the free-standing bath filler FS1

As with all our products, we offer easily accessible after-sales service and support from our professionals, each of whom has been trained at our dedicated VOLA Academy or by our local representative.
