VOLA is the creator of the original modern tap. Our contemporary product range continues to be led by the pure geometric forms of Arne Jacobsen and Verner Overgaard. The company’s unrivalled mix of modern technology and modular design integrates water into architecture with understated simplicity.

VOLA stands for excellence in design, craftsmanship, and responsible manufacturing with a constant emphasis on research, development and innovation. VOLA products can be found in many distinguished private houses and public buildings around the world, pairing award-winning product design with award-winning architecture.

2471R 090E
One handle build-in mixer with diverter and swivel spout. In brushed stainless steel.
In the late Sixties, the owner of VOLA, Verner Overgaard was inspired by the challenge of creating a tap with hidden pipes and plumbing, placing equal emphasis on contemporary design and function.

Overgaard’s design principals were closely aligned with Arne Jacobsen, the celebrated architect and product designer, who had recently won a competition to design the National Bank of Denmark. Jacobsen, with his combination of bold Modernist design integrity and his eye for the minutest detail, was the ideal partner for this challenge.

It was at the National Bank of Denmark that the iconic VOLA tap design made its first public appearance, attracting immediate international acclaim. With just the spout and lever visible, it was our first fully integrated, single lever mixer tap, with a legendary name attached to its conception.

Prioritising function and proportion without compromising style or grace, the new VOLA products became celebrated classics and Jacobsen’s design was to change little in almost fifty years. Much imitated but never equalled, VOLA has been the designers’ & architects choice ever since.
From the earliest days of the company, VOLA has emphasised the importance of craftsmanship and the role of hand-made processes in creating their products, so that every product coming out of the factory is finished to an exceptional level of detail.

At VOLA, traditional techniques like hand-polishing are used alongside modern machine tools to maintain high levels of quality and efficiency throughout the manufacturing process. These have resulted in continuous improvements and enhancements across the entire product range. Our modular range evolves with innovation and design integrity at its core.
THE JOURNEY OF A PRODUCT
OUR HEAD SHOWER
Classically modern in form and crafted from the highest quality materials, VOLA products are pure design inspiration. Precision machining, grinding, brushing and polishing is used on superior grade solid brass, bars and stainless steel, ensuring every VOLA product is meticulously shaped and beautifully finished. Specially developed techniques add the unique VOLA touch, transforming unfinished metal ingots into perfectly conceived products.
MODULAR BY DESIGN
The beauty of VOLA is the flexibility found within strict order. The original designs have been greatly expanded over the decades, with an almost infinite variety of valves, handles, plates and accessories. Available in a wide range of finishes, from sleek, brushed stainless steel to warm, natural brass, together with 14 vibrant colours. VOLA products can be configured to your space and requirements while always retaining their design integrity.

The first VOLA mixer, the 111, is the essence of pared back form, a circle within a circle, bisected by a simple line.
Specified by the best

Architects have always had a strong affinity with VOLA, drawn to its minimal aesthetic and exceptional flexibility. From international airports to leading art galleries. The world’s leading architects chose VOLA to enhance their interior experience.

Spa products
The Waterfall Shower and Kneipp Hose complete the wellness cycle, providing an invigorating flow of water to stimulate the body after the warmth of the spa.
The Waterfall Shower is a quintessential VOLA piece, delivering a therapeutic flow of cold water in a product that is sleek and discreet. Designed for home and commercial spa installations, the Waterfall Shower is a vital aspect of the spa experience, providing an invigorating cascade of water that cools and contracts blood vessels dilated by heat.

**COMBI-32**
Shown opposite, Waterfall Shower, Kneipp Hose and build-in stop valves, in brushed stainless steel.
COMBI-21
Thermostatic mixer with three-way diverter
Round-head shower, hand shower and body jets, in brushed stainless steel.
Round Series
4321 RS10
Build-in basin taps, each with an on-off sensor, in brushed stainless steel, shown with two electronic soap dispensers, in black, with brushed stainless steel surround.

RS2
Shown below, build-in tissue dispenser, in black with brushed stainless steel surround.

RS1
Shown below, build-in waste bin, in black with brushed stainless steel surround.
Detailed design, material purity and high-technology combine to make the fully integrated RS10 soap dispenser an aesthetically pure component of any washroom. Motion detectors dispense the perfect portion of foam or liquid soap, while the 4321 sensor-operated tap delivers water with a wave of the hand.

4321 RS10
Build-in basin tap with on-off sensor, in brushed stainless steel, shown with electronic soap dispenser in black, with brushed stainless steel surround.

RS10
Electronic soap dispenser, in black, with brushed stainless steel surround.

4321
Shown opposite, build-in basin tap with on-off sensor, in brushed stainless steel.
From Jacobsen’s earliest designs onwards, the circular form has defined the VOLA aesthetic. The award-winning Round Series is a unified system of circular elements, from the Round-head shower to tissue holder and waste bin, that allows designers to create harmonious, holistic interiors.

RS2
Shown opposite, build-in tissue dispenser, in black, shown with 4321 sensor tap, RS10 electronic soap dispenser and RS1 build-in waste bin, in brushed stainless steel.

RS1
Build-in waste bin, in black, with brushed stainless steel surround.

RS3
Retrofit waste bin, in white, with brushed stainless steel surround.
Towel warmers
T39
Shown above, build-in modular heated towel rail, in brushed stainless steel.

FS1
Shown right, free-standing bath mixer with hand shower, in brushed stainless steel.
Our commitment to sculptural modularity is epitomised by the T39 towel rail. Pairing a meticulously refined aesthetic with a simple modular system, the installation can be expanded from three to twenty rails with custom defined inter-rail spacing from 100 to 300 mm. A separate control aligns precisely with the cantilevered elements. Electric or central heating options available.

T39
Shown opposite, build-in modular heated towel rail, in polished chrome.
The effortless simplicity of the T39 enhances the architectural harmony of any space.
Accessories
Opposite from left to right, top to bottom.

T10 Soap dispenser.
T3 Soap magnet.
T20 Mirror holder.
T17 Towel hooks.
T23 Grab rail.
T12 Toilet roll holder.
T14 Spare toilet roll holder.
RS83E Electronic dual flow cistern flush.
T12-BP Toilet roll holder, without back plate.
T33 Toilet brush holder for wall mounting.
A34 Trap.

All in brushed stainless steel other than the T3, shown in polished chrome.
T36
Soap dispenser, in polished chrome.

A63
Unslotted push-operated waste plug, in polished chrome.

A62
Slotted push-operated waste plug, in polished chrome.

T34
Shower rail with hand shower, in brushed stainless steel.
The perfect companion piece to our iconic Round Series shower head, the T60 hand shower gives you flawless control over your bathing experience. Paired with the precise purity of a matching shower rail, it can either be fixed in place or held in the hand.

**T60**
Shown opposite, hand shower, with hose, in brushed stainless steel.

**T65**
Shower rail with hand shower, in brushed stainless steel.
Made in Denmark
VOLA does colour unlike any other manufacturer, rigorously tested to ensure unblemished surfaces. From the very first Jacobsen-designed taps, colours have been part of the VOLA world.

Today’s vivid palette of ultra hard-wearing powder-coated finishes provides even more choice for dynamic interior design.
EXCLUSIVE COLOUR SERIES

The VOLA Exclusive Range takes our craftsmanship and detailing to another level. Produced specifically for contracts, these exquisite finishes represent the ultimate in bespoke design. The precious coatings include warm golds and vibrant coppers which showcase the same exceptional technical detailing and level of surface quality as regular VOLA finishes.
Colour brings design to life. VOLA has brought colour to interiors since the earliest days of its Jacobsen range.

Today’s collection of standard finishes and bold colours adds new shape and structure to VOLA products. The colours begin life as powder, transferred electrostatically to the fitting and then baked to create an unblemished and highly durable surface.

The VOLA Academy was created to share our many decades of knowledge with designers and architects, specifiers and installers. The Academy invites experts to share their knowledge and inspiration, enabling our factory to educate as well as create. It has become a place where our history is shared, our processes are demonstrated and the art of specifying and installing VOLA products is explained.
GREEN PROCESSES WITHIN VOLA

Water is life. Without purity and a minimal environmental footprint, we risk compromising the one element the company is dedicated to serve. Sustainability is therefore fundamental to the VOLA way of business. VOLA products are designed to last generations, with interchangeable components allowing for simple servicing and upgrades. Water flow is regulated and controlled to meet the most rigorous standards, promoting efficiency in home and office environments.

Our skilled workforce is empowered to improve production processes and seek out inefficiencies. Hand processes that have evolved over decades dominate the factory, while automation is used only to enhance function, quality and durability.
Our streamlined systems and factory processes ensure excess waste is minimised. All materials are used with maximum efficiency, with close to 100% of recycled waste matter returned to suppliers. VOLA only sources from approved suppliers, transforming the very best quality brass or stainless steel into finishes that are truly precious.

The company’s internal system of quality management oversees procurement and innovation, ensuring VOLA has received a steady stream of awards, approvals and accreditations.
VOLA ACCREDITATIONS

VOLA transforms the finest raw materials into the finest products to create an investment for life. Quality control is essential and at every stage of the production process, the company’s strict procedures ensure that materials are of the highest grade, finishes are perfect and mechanisms meet exacting standards. VOLA has the following quality approvals:

KV15
Two-handle mixer with swivel spout, in polished chrome.
VOLA AWARDS
VOLA continues to win awards, with every new product representing a fusion of timeless design and manufacturing excellence. From the debut of Arne Jacobsen’s very first creation, through to contemporary products designed by Aarhus Arkitekterne, the architects of the VOLA headquarters, the company has been synonymous with innovation and elegance, exhibited and honoured internationally. VOLA ensures that water, wellness, health and happiness are integral elements of contemporary architecture.

VOLA IS VERY PROUD TO HAVE BEEN CHOSEN FOR THE FOLLOWING AWARDS:

1969 ID-prisen
1981 Internationaler Innenarchitektur-Preis für Ausbau-Produkte
1990 Busse Longlife Design Award
1995 ID-klassiker prisen
2003 GOOD DESIGN Award 2003. VOLA HV1
